

HAUGHLEY PARISH COUNCIL
17TH MARCH, 2020

COVID-19 PANDEMIC

COVID-19 SYMPTOMS are: a new, dry cough, which persists and a high temperature (or fever). Body temperature more than 38.3° C(101° F) is usually considered as a fever.

The closure of amenities and social distancing is going to be hard, so what can we do to help each other? We are a small community and between us we know which Haughley folk are most likely to need support. Local groups and clubs are already helping their members and in addition we urge ALL the fit and well to keep an eye on their near neighbours and to do shopping and collect medicines etc. as needed.

Remember this is a changing situation and further advice will no doubt be forthcoming, so keep an eye on the National News and remember the importance of good hand hygiene and social distancing. Please keep as safe and well as you can, but if you develop the COVID-19 symptoms, call 111 for advice. Do NOT go hospital or your doctor's surgery.

BEWARE STRANGERS

Hoaxes and scams designed to relieve the vulnerable of their money and personal details are being reported. Regardless of how contact is made: email, phone, leaflet or in person, DO NOT give personal information or money to a stranger in exchange for services or medicines etc.

VOLUNTEERS: A FINAL MESSAGE

To prevent causing avoidable alarm, please concentrate on helping those who know you. THANK YOU
