

GREEN ROAD DEVELOPMENT

BLOOR HOMES

As you are most probably aware, Bloor Homes gained reserved matters approval on 29th April and since then has been submitting information to discharge the planning conditions.

Bloor has also been carrying out some vegetation removal works on site together with the installation of reptile exclusion fencing.

It is Bloor's intention to start setting up the site towards the end of June. This will involve the erection of hoarding, temporary fencing and forming the site compound including welfare facilities.

Bloor is now starting the site enabling works, getting machinery onto site and forming temporary construction access.

With regards to temporary construction access, Bloor will be removing some vegetation near the road and adjacent to the Pavilion boundary. To assist in improving the visibility for drivers exiting the Pavilion car park, vegetation behind the Football Club sign will be removed at the same time.

It should be noted that the well-trodden path on the edge of the development site and running parallel with Thompson Court, is not a public footpath. This path is on private land owned by Bloor Homes and it has been closed off with fencing. Parishioners should no longer use this path.
