

Haughley Village Hall Environmental Policy

Haughley Village Hall provides a facility in the centre of the village of Haughley for the use of groups and individuals to hold meetings, stage events, show films, hold private functions or use for any legitimate purpose.

The Haughley Village Hall Management Committee is keen to minimise the environmental impact of the activities that take place in the hall. We will comply with all applicable legal and other relevant requirements that relate to the activities that take place in the hall and, as far as practicable, accepted best practice in environmental management and encourage users to do likewise.

We are committed to:

- Making use of products that have been manufactured using energy saving technologies and initiatives.
- Using utilities in a responsible and economic way to minimise negative impacts on the environment.
- Managing waste according to our duty of care, minimising volumes going to landfill, by re-use and recycling wherever possible.
- Purchasing supplies wherever possible which are recycled and recyclable, and whose production and use minimises the consumption of natural resources.
- Conserving resources by ensuring that the building and its fittings are properly maintained and reflect appropriate eco guidance.
- Communicating this policy to organisations and individuals using the hall.

Objectives and targets are set and reviewed each year according to the commitments for greening Government operations and procurement. When requested this policy will be available to the public.
